Statistics – detailed focus

EUROSTAT – core player

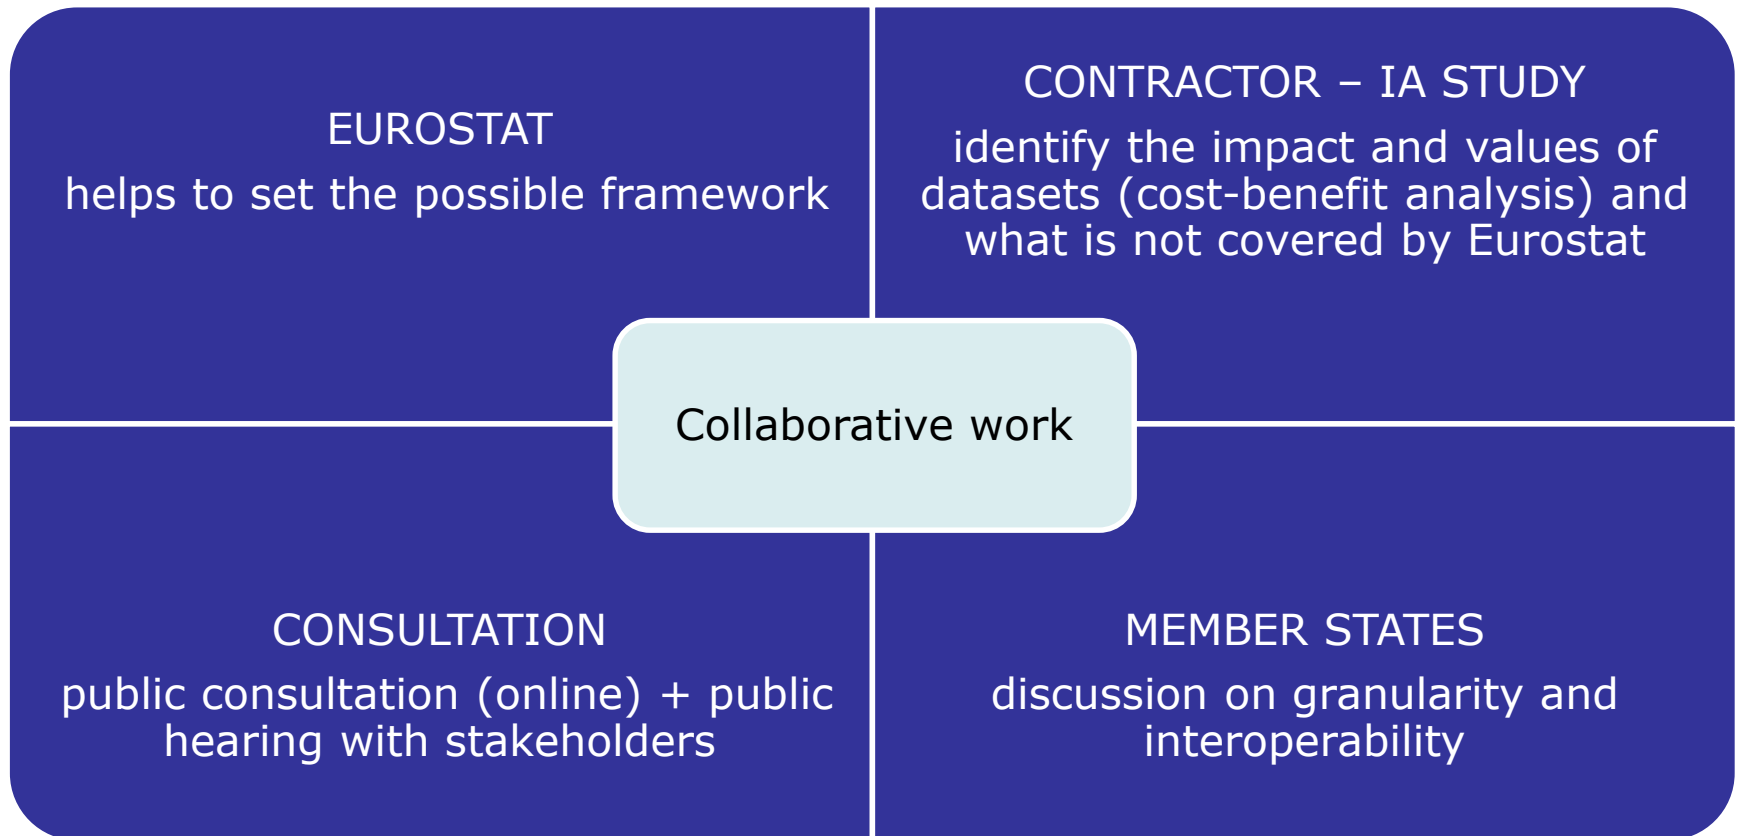

EU Policy indicators

- Europe 2020
- Euro Indicators
- European Pillar of Social Rights
- UN Sustainable Development Goals 2030
- Macroeconomic imbalance procedure (MIP)
- NACE rev. 2

Statics by theme

- General and regional statistics
- Economy and finance
- Population and social conditions
- Industry, trade and services
- International trade
- Transport

The way forward

Companies and Company ownership (responses)

- Several types of company registers:
 - Register of entities and enterprises
 - Register of accounting records
 - Register of associations
 - Register of beneficial ownership
 - Register of foundations and public healthcare institutions
 - Register of NGO's, churches and political parties
 - Insolvency registers
 - Register of business mortgage
 - Financial statements
 - Etc...

Challenges

- National business registers under Directive (EU) 2019/1151 (amending the Directive on the use of digital tools and processes in company law)
- The registers of beneficial ownership (under the 5th Anti-Money Laundering Directive)
- Complicated on different levels: not free of charge, not machine readable, not available via API – technical obstructions, (only access, re-use is not covered)
- Issues related to data protection law, i.e. (holder of the licence, name of the company, collection of authorised documents, commercial licence, address of the company birth of holder)

The way forward
